

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet:	EKOTOKSIKOLOGIJA
COURSE TITLE:	ECOTOXICOLOGY

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Varstvo okolja in ekotehnologije, 1. stopnja	Modul: Okolje in zdravje	2. in 3.	/
Environmental Protection and Eco-technologies, 1 st level	Module: Environment and health	2 nd and 3 rd	/

Vrsta predmeta / Course type Modularni predmet / Modular subject

Univerzitetna koda predmeta / University course code: ETOX

Predavanja Lectures	Seminar Seminar	Sem. Vaje Tutorial	Lab. vaje Laboratory work	Teren. vaje Field work	Samost. delo Individ. work	ECTS
25	/	20	10	/	90	5

Nosilec predmeta / Lecturer: prof. dr. Bojan Sedmak, viš. pred. dr. Anja Bubik / Bojan Sedmak, Ph.D, Full Prof., Anja Bubik, Ph.D., Lecturer

Jeziki / Predavanja / Lectures: Slovenski / Slovenian
Languages: Vaje / Tutorial: Slovenski / Slovenian

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Opravljen izpit iz predmeta Kemija in okolje

Prerequisites:

Passed exam Chemistry and the Environment

Vsebina:

Osnovni načela v toksikologiji.

- Znaki zastrupitve.
- Izpostavljenost opredeljuje toksičnost.
- Doza naredi strup.

Toksikologija in ekotoksikologija.

Glavne skupine onesnaževal.

Anorganski ioni.

- Kovine.
- Anioni.

Organska onesnažila.

- Oglikovodiki.
- Poliklorirani bifenili.
- Insekticidi.
- Herbicidi.
- Detergenti.
- Zdravila.

Radioaktivni izotopi.
Plini.

Content (Syllabus outline):

- The basic principles of Toxicology
- Toxic syndrome recognition
- Route of exposure as determinant of toxicity
- The dose makes the poison

- Toxicology and Ecotoxicology

- Major classes of pollutants

Inorganic ions

- Metals
- Anions

Organic pollutants

- Hydrocarbons
- Polychlorinated biphenyls
- Insecticides
- Herbicides
- Detergents
- Pharmaceuticals

Radioactive isotopes
Gaseous pollutants

<p>Nanodelci. Onesnažila v ekosistemih. Onesnaževanje prsti. Onesnažila v sedimentih, Onesnažila v vodnih ekosistemih. Prenos po prehranjevalnih verigah.</p> <p>Onesnažila in organizmi. Prevzem. Distribucija. Shranjevanje. Metabolizem. Izločanje.</p> <p>Učinki onesnažil na posamezne organizme. Biokemični učinki. Genotoksičnost. Nevrotoksičnost. Strupi, ki učinkujejo na mitohondrije. Inhibicija ATP-az. Motilci endokrinega sistema. Inhibitorji fotosinteze. Inhibitorji rasti.</p> <p>Učinki onesnažil na nivoju populacij in združb. Številčnost populacij. Rast populacij. Biodiverziteteta. Odpornost na onesnaženje. Evolucijski odgovori na okoljske spremembe.</p> <p>Naravna onesnaževala in naravni cikli Eutrofikacija. Kisel dež. Sevanje in radioizotopi. Onesnaženja z nafto. Globalno segrevanje in toplogredni plini. Ozonski plašč in UV sevanje.</p> <p>Globalni problemi onesnaževanja okolja. Potovanja onesnaževal na velike razdalje in globalni transport. Plastične mase. Nanodelci. Uporaba pesticidov iz zraka. Škodljiva cvetenja alg in cianobakterij.</p> <p>Praktično usposabljanje v računalniški učilnici</p> <p>(Q)SAR – Ugotavljanje odnosa med strukturo učinkovine (toksina) in njenim delovanjem.</p>	<p>Nanoparticles - Pollutants in ecosystems Fate in soils Pollutants in sediments Pollutants in aquatic ecosystems Transfer along food chains</p> <p>- Pollutants in organisms Uptake Distribution Storage Metabolism Excretion</p> <p>Effects of pollutants on individual organisms Biochemical effects Genotoxicity Neurotoxicity Mitochondrial poisons Inhibition of ATPases Endocrine disruptors Photosystem inhibitors Plant growth inhibitors</p> <p>Effects of pollutants on populations and communities Population abundance Population growth rate Biodiversity Resistance to pollution Evolutionary responses to environmental changes</p> <p>Natural pollutants and natural cycles Eutrophication Acid rain Radiation and radioisotopes Oil pollutions Global warming and greenhouse gasses Ozone layer and UV radiation</p> <p>Pollution problems worldwide Long range movements and global transport of pollutants Plastics Nanoparticles Aerial application of pesticides Harmful algal and cyanobacterial blooms</p> <p>Practical training in a computer classroom</p> <p>(Q)SAR – Determination of Quantitative Structure Activity Relationship</p>
---	---

Temeljni literatura in viri / Textbooks:

Osnovna literatura:

- C.H. Walker, S.P. Hopkin, R.M. Sibly, D.B. Peakall: Principles of Ecotoxicology. 4th Edition, Taylor & Francis, London 2012.
- J.A. Timbrell: Introduction to Toxicology. Informa Healthcare, New York 2009.

Dodatna literatura:

- A.W. Hayes: Principles and Methods of Toxicology. 4th Edition, Taylor & Francis, London 2014.
- J.A. Timbrell: Principles of Biochemical Toxicology. Informa Healthcare, New York 2009.
- B. Sedmak: Cianobakterije in njihovi toksini, Vse živo, NIB, Ljubljana, 2011.

Cilji in kompetence:

Predmetno specifični cilji in kompetence:

- študente seznaniti z osnovami o strupenih snoveh in o učinkih njihove prisotnosti v okolju
- študenta usposobiti za samostojno delo in uporabo ustreznih metod in tehnik

Splošne kompetence:

Študenti bodo pridobili teoretična in praktična znanja ter razumevanje s področja ekotoksikologije.

Študenti bodo pridobili osnovna znanja o toksičnih učinkih onesnaževal na organizme, populacije, biocenozo in ekosisteme ter možne načine ocene toksičnosti. Naučili se bodo pridobiti ekotoksikološke podatke in jih jih bili sposobni tudi kritično interpretirati.

Objectives and competences:

Specific competences:

- students are acquainted with basic knowledge of various toxic substances and their influence on various environments.
- students are qualified for individual and team work in the usage of appropriate methods and techniques

General competences:

Students will acquire the theoretical and practical knowledge and understanding in the field of ecotoxicology.

Students will gain basic knowledge about toxic effects of pollutants on organisms, populations, biocenosis and ecosystems and possible ways of toxicity assessment. They will learn how to obtain ecotoxicological data and acquire the ability to interpret them.

Predvideni študijski rezultati:

Znanje in razumevanje

Študent bo ob zaključku tega predmeta sposoben:

- Kritično ovrednotiti tveganja, ki jih strupene snovi predstavljajo v različnih okoljih
- Oblikovati strategije za oceno izpostavljenosti
- Analiza in interpretacija meritev izpostavljenosti z različnimi orodji za modeliranje (stohastični in deterministični)
- Cenijo prednosti in slabosti toksikoloških in epidemioloških študij za pridobitev razmerja med odmerkom in odzivom
- Oblikovati strategije za preučevanje razmerja med odmerkom in odzivom
- Oceniti pogosto uporabljene metode za meritve učinka na zdravje

Prenesljive/ključne spretnosti in drugi atributi:

Intended learning outcomes:

Knowledge and Understanding

The student will be at the completion of this course able to:

- • Critically evaluate the risks of the presence of toxic substances in various environments.
- • Design strategies for exposure assessment
- • Analyse and interpret exposure measurements applying different modelling tools (stochastic and deterministic)
- • • Appreciate the advantages and disadvantages of toxicological and epidemiological studies for deriving dose-response relationships
- • Design strategies for study of dose-response relations
- • Evaluate frequently used methods for health effect measurements

- uporaba ustreznih metod in tehnik pri reševanju konkretnih znanstvenih problemov na izbranem področju
- zbiranje in interpretacija podatkov
- poročanje

spretnosti uporabe domače in tuje literature

-

Transferable/Key Skills and other attributes:
use of appropriate research methods and techniques concerning concrete scientific problems within the field of investigation

Metode poučevanja in učenja:

Oblike dela:

- predavanja
- seminarji

Metode dela:

- razlaga
- dialog, diskusija
- preučevanje praktičnih primerov
- aktivno skupinsko delo

priprava, predstavitev in zagovor seminarske naloge

Learning and teaching methods:

Forms of teaching:

- in-class lectures
- seminars

Teaching methods:

- explanation
- discussion, debate
- practical demonstration
- teamwork

preparation, presentation and defence of a seminar paper

Načini ocenjevanja:	Delež (v %) Weight (in %)	Assessment:
<ul style="list-style-type: none"> - pisni izpit - priprava, predstavitev in zagovor seminarske naloge <p>Ocenjevalna lestvica:</p> <p>Ocene 5 negativno, 6-10 pozitivno</p> <ul style="list-style-type: none"> ▪ zadostno 6: 51-60 % ▪ dobro 7: 61-70 % ▪ prav dobro 8: 71-80 % ▪ prav dobro 9: 81-90 % ▪ odlično 10: 91-100 % 	<p>50</p> <p>50</p>	<ul style="list-style-type: none"> - written exam - preparation, presentation and defence of seminar paper <p>Grading system:</p> <p>Garding: 5 fail 6-10 pass</p> <ul style="list-style-type: none"> ▪ Sufficient D (6): 51-60 % ▪ Good C (7): 61-70 % ▪ Very good B (8): 71-80 % ▪ Very good B+ (9): 81-90 % ▪ Excellent A (10): 91-100 %

Materialni pogoji za izvedbo predmeta :

- predavalnica z multimedijsko opremo

laboratorij s specifično laboratorijsko opremo

Material conditions for subject realization:

- classroom with the multimedia equipment

Obveznosti študentov:

- Izdelana seminarska naloga

Student's commitments:

- Seminar paper

Reference nosilca predmeta:

Bojan Sedmak Št raziskovalca 7736

Avtor številnih mednarodno citiranih znanstvenih člankov s področij, toksikologije, ekotoksikologije in biokemije. Najbolj citiran znanstveni članek je do leta 2018 dosegel preko 200 navedb.

Journal of Environmental Sciences (Elsevier) - Član uredniškega odbora

Lecturer's references:

Bojan Sedmak researcher No. 7736

Author of numerous articles from the fields of toxicology, ecotoxicology and biochemistry are cited internationally. The most frequently cited article until 2018 has over 200 entries.

Journal of Environmental Sciences (Elsevier) – Member of the Editorial Board

Patenti

LEŠTAN, Domen, SEDMAK, Bojan, LAKOVIČ, Gorazd. *Preprečevanje masovnega pojavljanja škodljivih cianobakterij : patent št. 23987 (A), 2013-08-30.* Ljubljana: Urad RS za intelektualno lastnino, 2013. 5 str., [ilustr.]. [COBISS.SI-ID [2885199](#)] patentna družina: WO2013115732 (A2), 2013-08-08
